Work Experience

Identomat   **Champaign, Illinois (remote)**
Frontend developer   *March 2023 - Present*

- Building and optimizing dynamic, responsive UIs for client-side applications.
- Reducing the loading time of our existing web and server side applications and reducing the DOM hierarchy.
- Collaborating with Product Managers, UI/UX Designers, Product Owner on a daily basis.
- Cleaning and Refactoring legacy code, turning JS modules into svelte components and PHP parts into Node.
- Developing and implementing features on server side.
- Creating custom company UI library and writing docs for components.
- Technologies: JavaScript, Svelte, Node, Express, PHP, MongoDB, Cypress, Tailwind.

Freelance   **Remote**
Frontend Developer   *September 2022 - Present*

- Building websites, web apps, implementing features, making existing projects more user friendly, beautiful, dynamic and responsive with cross-browser compability.
- Developing projects with clean and reusable components with docs.
- Also working on server side with backend apps and databases, but still more frontend heavy.

Bitoid   **Tbilisi, Georgia**
Frontend Developer   *October 2022 - March 2023*

- Working with a team, led by senior software engineers.
- Creating UIs according to designs and instructions.
- Making client side projects responsive, cross-browser compatible and user friendly.
